

## Math + Games = Fun

We are excited for the return of 2 favorite math Clubs this fall at Blessed Sacrament. 6 week Sessions run from 3:15-4:15 and are led by BSS teachers. Each session is offered for grades K-5.

### Math Games - Wednesdays (Oct 10<sup>th</sup>-Nov 14<sup>th</sup>)

Do you love playing games? Do you enjoy putting things together, taking them apart and figuring out how the pieces go together? This is the club for you. We will introduce new strategies to build number sense and reinforce these skills with fun and engaging games and activities each week. Join us as we work together to solve challenges using our strategy and logic skills.

### Building Club – Thursdays (Oct 11<sup>th</sup> –Nov 15<sup>th</sup>)

Do you have an eager engineer or architect? Every class will be a fun, enriching experience for your child. We will build new projects each week using the classic building tools loved by children such as Legos, Pattern Blocks, Lincoln logs, Emido Interlocking blocks, Brain Flakes, Dominoes, etc. Collaborating with a partner, students experience the hands-on fun of model-building, from concept to completion. Free-play time rounds out the hour, giving students an opportunity to develop and expand their creativity and imagination.
